Sirs,I listen to the local traffic daily on my satellite radio in addition to the local stations they are very useful to me as I am moving around the city alot in Dallas. Please don't take away my ability to choose what I listen to in my own vehicle. It would reduce my freedom around town, the satellite station broadcasts continously and the local stations only a couple of times per hour. I still listen to both but having a continous traffic report helps me avoid the snarled up areas common in Dallas, instead of finding out about them sitting still in traffic.

We have so few tools working for us in a city full of constant construction and a real traffic nightmare for those who can't get any warning of problems please don't screw with a REALLY useful one! Give us the advantage for a change, let US decide who gets our business. I pay money every month for a service that I obviously feel is worth it. If the local stations came anywhere close to what I pay for I wouldn't have to buy it.

Please reject petition 04-160, please allow them to give me what I'm paying for, the music & talk that I like & a helping hand when I NEED it, not just when they get around to it.

Respectfully,
K. Knox
